CLOUD STORAGE | NETWORK VIDEO RECORDER

64 GB Local Storage | Supports up to 6 IP Cameras

Video Stored Locally and/or in the Cloud

PRODUCT OVERVIEW

The NVR-64 is a network video recorder with both local and cloud storage. Cloud technology allows for a simple setup with instantaneous viewing of video. Comtrend's cloud technology is powered by Smartvue's latest S12 surveillance storage solution. This solution brings new recurring monthly revenue opportunities such as concierge services, active system health monitoring, and more!

KEY BENEFITS

Increased Recurring Monthly Revenues Through Value-Added Services
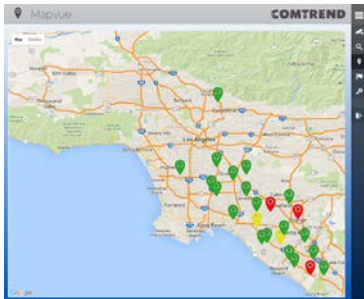

Concierge Services

On demand, you can review, identify, and transfer critical events to your customer as a premium service.

Active System Health Monitoring

At a glance, view a customer map of network NVRs and cameras:

GREEN= Online

YELLOW= Camera Offline

RED=NVR Offline

NVR-64

64 GB Local Storage | Supports up to 6 IP Cameras

Cloud Technology

Per Camera Video Retention
Optimize storage by setting per-camera video-length storage durations.

Video Assurance
Even if an NVR is stolen or destroyed, video viewing is left unaffected because video is stored in the cloud.

Connect & Go Setup

✓ No port forwarding required
✓ No static IP/DDNS necessary
