A. Package Contents

Before starting to use this router, please check if there’s anything missing in the package, and contact your place of purchase to claim missing items:

- Driver/Utility/QIG/User Manual CD-ROM (1)
- Broadband Router (2)
- Ethernet cable (3)
- Printed QIG (4)
B. Installation

Please follow the instructions below to setup the Comtrend wireless router:

1. Connect your xDSL / cable modem to the WAN port of the router with an Ethernet cable.

2. Connect your computers and network devices (network-enabled consumer devices other than computers, like game consoles, or a switch / hub) to an available LAN port of the router.

3. Connect the A/C power adapter to the wall socket, and then connect it to the Power socket of the router.

Please check all LEDs on the front panel. The Power LED should be steadily on, WAN and LAN LEDs should be on if the computer / network devices connected to the respective port of the router are powered on and correctly connected.

If the Power LED is still off and you're sure that all cable connections are connected properly, please contact your place of purchase for assistance.
C. Network Setup

A computer with a wired Ethernet connection to the wireless router is recommended for first-time setup and configuration.

1. From the Network Connections window, open Local Area Connection (You may also access this screen by double-clicking the Local Area Connection icon in your taskbar). Click the Properties button.

2. The Local Area Connection Properties window will appear. Select Internet Protocol (TCP/IP), then click ‘Properties’.
3. Select ‘Obtain an IP address automatically’ and ‘Obtain DNS server address automatically’, then click ‘OK’.

4. Start your web browser and input the IP address (http://192.168.0.1) of the wireless router in the address bar, and the following window should be shown. Please input the user name and password (by default, both are admin), then click ‘OK’ to access the web management interface of the wireless router.

   Default user name: admin
   Default password: admin

5. Once logged in, you will need to go through the Quick Setup process.

   Select the time zone of the area in which you live, then click ‘Next’.
8. Click 'Apply'.

9. When you see this message, the router will be ready with new settings within 60 seconds.

10. You should now be able to access the Internet. If you have any problems, repeat section C of this guide or visit www.comtrend.com for assistance.

For instructions on advanced settings and wireless network setup, please refer to the user manual on the CD-ROM included in the box.
