

## Switch

5-Port 10/100

# ES-7205

# 5-Port Fast Ethernet Switch

The ES-7205 is a Fast Ethernet desktop switch designed for small office or home office applications. It provides five 10/100 Mbps auto-negotiation ports and supports auto-MDI/MDIX. The ports can be used to connect to a PC or Server as well as uplink ports to connect other network devices. With the ES-7205, users can easily add additional ports to their home or office network within minutes and with no configuration necessary. The ES-7205 supports automatically shifting to power-saving mode when ports are not in use.

## FEATURES

---

- Five 10/100 Mbps auto-negotiation Ethernet ports.
- Complies with IEEE802.3, IEEE802.3u Ethernet standards.
- Supports auto MDI/MDIX to simplify network setup and maintenance.
- Supports IEEE802.3x full duplex flow control, half duplex (Backpressure) flow control.
- Power saving design when ports are inactive.
- Integrates 2K MAC address table.
- Supports MAC address studying/aging automatically.

# ES-7205

5-Port 10/100

## SPECIFICATIONS

---

Chipset Solution	RTL8305NB
Power	External power supply 5V/0.6A
Power Consumption	MAX AC Input 1.49W MAX DC Input 1.03W
Standards and Protocols Supported	IEEE 802.3, IEEE 802.3u
Switching Fabric	1 Gbps
MAC Address Table	2K
Port	Five 10/100M LAN ports
Temperature	Operating Temperature 0°C~40°C Storage Humidity -40°C~70°C
Humidity	Operating Humidity 10%~90% RH no condensing Storage Humidity 5%~90% RH no condensing
