

Switch

8-Port 10/100

ES-7208

8-Port Fast Ethernet Switch

The ES-7208 is a Fast Ethernet desktop switch designed for small office or home office applications. It provides eight 10/100 Mbps auto-negotiation ports and supports auto-MDI/MDIX. The ports can be used to connect to a PC or Server as well as uplink ports to connect other network devices. With the ES-7208, users can easily add additional ports to their home or office network within minutes and with no configuration necessary. The ES-7208 supports automatically shifting to power-saving mode when ports are not in use.

FEATURES

- Eight 10/100 Mbps auto-negotiation Ethernet ports.
- Complies with IEEE802.3, IEEE802.3u Ethernet standards.
- Supports auto MDI/MDIX.
- Supports IEEE802.3x full duplex flow control, half duplex (Backpressure) flow control.
- Power saving design when ports are inactive.
- Integrates 2K MAC address table.
- Supports MAC address studying/aging automatically.

ES-7208

8-Port 10/100 Switch

SPECIFICATIONS

Chipset Solution

RTL8309N

Power

External power supply 5V/0.6A

Power Consumption

MAX AC Input 2.1W
MAX DC Input 1.33W

Standards and Protocols Supported

IEEE 802.3, IEEE 802.3u

Switching Fabric

1.6 Gbps

MAC Address Table

2K

Port

Eight 10/100M LAN ports

Temperature

Operating Temperature 0°C~40°C
Storage Humidity -40°C~70°C

Humidity

Operating Humidity 10%~90% RH no condensing
Storage Humidity 5%~90% RH no condensing
